

## Joomla 1.5 – Add a Menu Link

Your menu will probably be on the home page of your website and can look like buttons, or a list. Inside Joomla your menu will be given a name, eg Main Menu, Top Menu. It is important to know the name of the Menu you want to use. For this example I am using 'Main Menu'

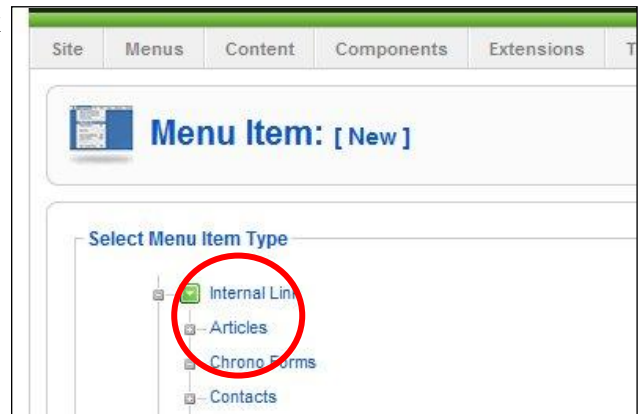

**Login** to the Administration section of your website (backend)

From the **Menus** option Select **Main Menu**

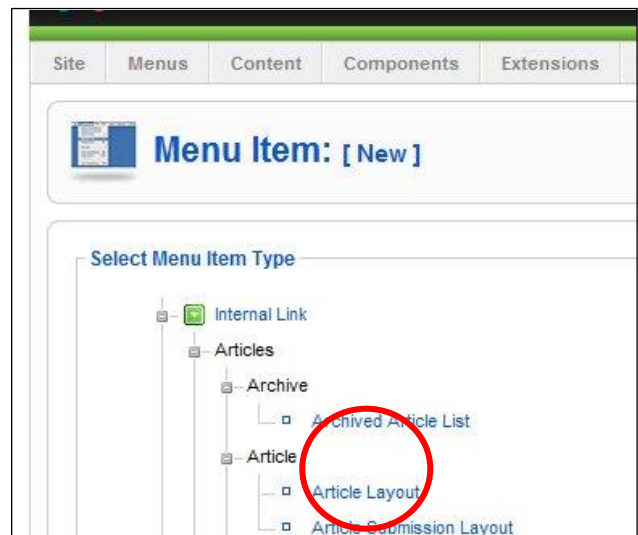

You are now in the **Menu Item Manager**. Click on the **New** button at the top right of the screen

You are creating a menu link to an Article, so click on **Articles** from the **Select Menu Item Type** list

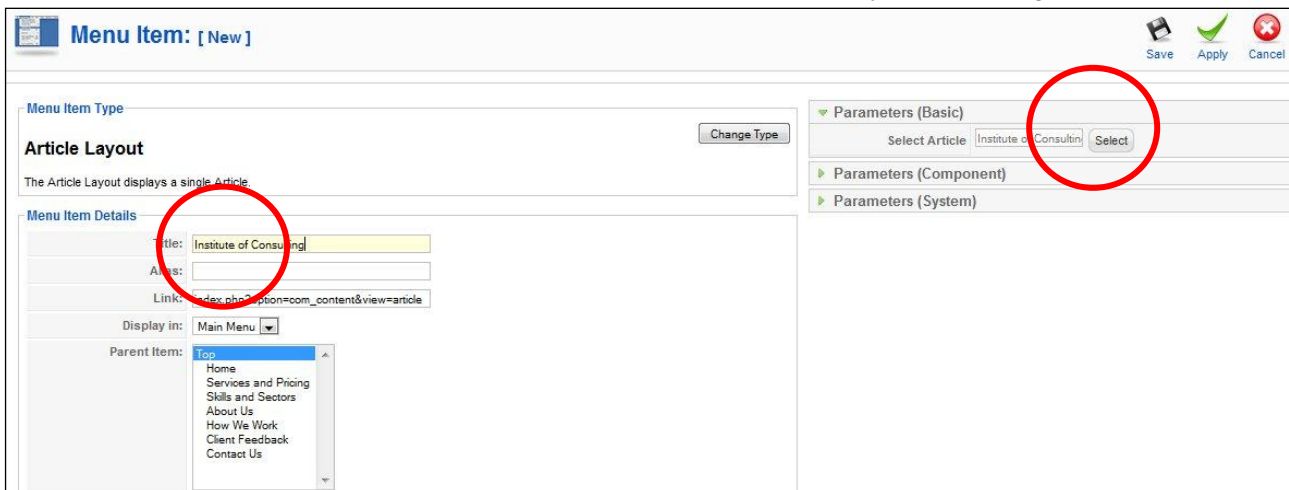

The list will expand

Click on **Article Layout**

Give the link a **Title**, and then click the **Select** button to select the Article you are linking

The title you enter will be the one shown on the actual link (or button).

Click **Save**

Repeat for each new link (button)

When you have saved your Link you can alter the order the links are placed on the page by using the arrows in the 'Order' column
